Maps

JANUARY-JUNE

1949

COPYRIGHT OFFICE
THE LIBRARY OF CONGRESS
WASHINGTON 25, D. C.

PREFACE

THIS part of the *Catalog of Copyright Entries* contains an alphabetical list of domestic and foreign maps which were registered in the Copyright Office from January 1, 1949, through June 30, 1949. Renewal registrations in this class made in this period are listed in Part 14A of the *Catalog*.

Arrangement.—The maps listed in this catalog are arranged alphabetically by main headings under which full information relating to each map is given. The list also includes brief entries in the form of cross references from the geographical areas represented by the maps and from copyright claimants, editors, compilers, etc. When more than one entry appears in the *Catalog* under a single heading, the entries are arranged alphabetically by title.

Entry.—The main heading under which each complete or main entry is alphabetized is the name of the "authority" (that is, the name of the person, firm, institution, or other agency primarily responsible for the content of the map), which term is not always synonymous with the term "author" as used in the Copyright Act. Under authority, the main entry includes the title, edition, size, and scale. The word "scale" is followed by the representative fraction if it can be ascertained. The linear scale as it appears on the map follows the representative fraction. Name of publisher and place of publication are given when the publisher and claimant are not the same. When no publisher is given, the claimant is also the publisher if the address is included in the copyright statement.

When a sheet consists of two or more maps, all of which are included in the claim for copyright, or when the title is selected from an outside cover and appears to include several specific map titles contained therein, the specific titles of the individual maps are given in a note preceding the copyright statement. In all other cases in which the facts known to the Office indicate that additional maps printed on the sheet are not included in a specific claim the note appears in brackets following the copyright statement. The note always includes the position of the additional maps in relation to the one for which main entry is made (e. g., "On sheet with," "On verso"); the title of the additional map, or the number of maps, if more than one; and, when accompanied by a separate copyright notice, a statement of the data contained in the notice. Maps which are merely insets of larger maps are not mentioned individually in the entry.

Area Cross References.—The area headings used in this catalog are those of the name of the largest geographical or political unit enclosed within

the borders of the map. When the borders of the map do not coincide in any way with a single geographical or political unit, the name of the most significant unit is used in the heading. When the map contains three or more States comprising part of one of the major geographical divisions of the United States one of the following headings is used: "New England, Middle States, South Atlantic States, North Central States, South Central States, Mountain States, and Pacific States."

Copyright Data.—The portion of the entry giving the facts of copyright registration begins with the copyright symbol © and consists of the name of the copyright claimant, date of publication as given in the copyright application, and the registration number. The abbreviation "1c" preceding the date indicates that one copy only has been deposited.

Deposit of Copies.—In the case of every copyright entry listed in this part of the *Catalog*, the deposit of copies (or copy) as required by Title 17, U. S. C., secs. 13 or 215, has been made.

Authority.—The *Catalog of Copyright Entries* is published by authority of Title 17, U. S. C., secs. 210 and 211. Section 210 provides that the *Catalog* "shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Organization of the Catalog.—This issue of the *Catalog* is part of Volume 3 of the Third Series. The parts are numbered according to the alphabetical sequence of classes as listed in Title 17, U. S. C., sec. 5. Letters are added to the part numbers to indicate subdivisions.

The classes of material principally contained in each part are listed, together with their respective symbols, under the title of the part in the Table of Organization which faces the title page in this issue. In each case, the first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis of registrations. The symbol R does not represent a class designated by the Copyright Act, but has been adopted by the Copyright Office to distinguish renewal copyright registrations. Some parts also contain registrations made under other symbols if the subject matter or type of material of these registrations is similar to that generally included in the part.

Orders.—The office calls attention to the fact that orders for all parts of the *Catalog* should henceforward be sent directly to the *Register of Copy-*

rights, Library of Congress, Washington 25, D. C. Orders may be placed as follows: (1) as subscriptions to continue until further notice, or (2) as orders for individual issues. All orders should state clearly the title and inclusive dates of the issues wanted. For the convenience of subscribers, payment may be made either in advance (accompanying the order) or upon receipt of an invoice from the Copyright Office. *Checks or money orders should be made payable to the Register of Copyrights.*

The price of each individual number of the *Catalog*

is given in the Table of Organization. The annual subscription rate for each part is twice the price of a single number, since all parts are issued semiannually. The complete *Catalog of Copyright Entries* for one year may be secured on a subscription basis for \$20.

Inquiries.—The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Please address communications of this nature to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

ABBREVIATIONS

The following list includes abbreviations used in this catalog with specific copyright or bibliographic meanings. Definitions are not given for abbreviations in common use.

a. k. a.	—also known as	fold.	—folded

COPYRIGHT REGISTRATIONS FOR MAPS

January–June 1949

Class F—Maps published in the United States	1, 291
Maps published outside the United States	1
Total	1, 292

The above figures show the registrations for maps for January–June 1949, but do not necessarily represent the exact number of entries in this issue of the *Catalog*.

MAPS

An alphabetical list of all maps registered during the period covered by this catalog. Each map is entered under authority (i.e., the name of the person, firm or other agency primarily responsible for the content of the map). Included in the list are cross references from the geographical areas represented by the maps and from copyright claimants, authors, compilers, etc. Under each main heading full information relating to the map is given.

COPYRIGHT OFFICE
THE LIBRARY OF CONGRESS
WASHINGTON 25, D. C.

REMOVAL OF DEPOSITS FROM COPYRIGHT OFFICE

NOTICE is given to authors, copyright proprietors and other lawful claimants that they may claim and remove before January 1, 1951, any article of the following named classes of published works deposited for copyright between January 1, 1947, and January 1, 1948, not reserved or disposed of as provided by sections 213 and 214 of Title 17 of the United States Code and still remaining in the files of the Copyright Office at the time of the request for their removal. The classes of published works covered by this notice are:

- Contributions to periodicals.

- Works of art; models or designs for works of art.

- Reproductions of a work of art.

- Drawings or plastic works of a scientific or technical character.

- Photographs.

- Prints and pictorial illustrations excluding prints or labels used for articles of merchandise.

Other published works and all unpublished works are not included in this notice.

The request for the removal of any copyright deposit should be signed by the person entitled thereto or his duly authorized agent. Such request should identify the work by stating the title, author, copyright proprietor, registration number and year of deposit, and should be addressed to the Copyright Office, Library of Congress, Washington, 25, D. C.

PREFACE

THIS part of the *Catalog of Copyright Entries* contains an alphabetical list of domestic and foreign maps which were registered in the Copyright Office from July 1, 1949, through December 31, 1949. Renewal registrations in this class made in this period are listed in Part 14A of the *Catalog*.

Arrangement.—The maps listed in this catalog are arranged alphabetically by main headings under which full information relating to each map is given. The list also includes brief entries in the form of cross references from the geographical areas represented by the maps and from copyright claimants, editors, compilers, etc. When more than one entry appears in the *Catalog* under a single heading, the entries are arranged alphabetically by title.

Entry.—The main heading under which each complete or main entry is alphabetized is the name of the "authority" (that is, the name of the person, firm, institution, or other agency primarily responsible for the content of the map), which term is not always synonymous with the term "author" as used in the Copyright Act. Under authority, the main entry includes the title, edition, size, and scale. The word "scale" is followed by the representative fraction if it can be ascertained. The linear scale as it appears on the map follows the representative fraction. Name of publisher and place of publication are given when the publisher and claimant are not the same. When no publisher is given, the claimant is also the publisher if the address is included in the copyright statement.

When a sheet consists of two or more maps, all of which are included in the claim for copyright, or when the title is selected from an outside cover and appears to include several specific map titles contained therein, the specific titles of the individual maps are given in a note preceding the copyright statement. In all other cases in which the facts known to the Office indicate that additional maps printed on the sheet are not included in a specific claim the note appears in brackets following the copyright statement. The note always includes the position of the additional maps in relation to the one for which main entry is made (e. g., "On sheet with," "On verso"); the title of the additional map, or the number of maps, if more than one; and, when accompanied by a separate copyright notice, a statement of the data contained in the notice. Maps which are merely insets of larger maps are not mentioned individually in the entry.

Area Cross References.—The area headings used in this catalog are those of the name of the largest geographical or political unit enclosed within

the borders of the map. When the borders of the map do not coincide in any way with a single geographical or political unit, the name of the most significant unit is used in the heading. When the map contains three or more States comprising part of one of the major geographical divisions of the United States one of the following headings is used: "New England, Middle States, South Atlantic States, North Central States, South Central States, Mountain States, and Pacific States."

Copyright Data.—The portion of the entry giving the facts of copyright registration begins with the copyright symbol © and consists of the name of the copyright claimant, date of publication as given in the copyright application, and the registration number. The abbreviation "1c" preceding the date indicates that one copy only has been deposited.

Deposit of Copies.—In the case of every copyright entry listed in this part of the *Catalog*, the deposit of copies (or copy) as required by Title 17, U. S. C., secs. 13 or 215, has been made.

Authority.—The *Catalog of Copyright Entries* is published by authority of Title 17, U. S. C., secs. 210 and 211. Section 210 provides that the *Catalog* "shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Organization of the Catalog.—This issue of the *Catalog* is part of Volume 3 of the Third Series. The parts are numbered according to the alphabetical sequence of classes as listed in Title 17, U. S. C., sec. 5. Letters are added to the part numbers to indicate subdivisions.

The classes of material principally contained in each part are listed, together with their respective symbols, under the title of the part in the Table of Organization which faces the title page in this issue. In each case, the first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis of registrations. The symbol R does not represent a class designated by the Copyright Act, but has been adopted by the Copyright Office to distinguish renewal copyright registrations. Some parts also contain registrations made under other symbols if the subject matter or type of material of these registrations is similar to that generally included in the part.

Orders.—The office calls attention to the fact that orders for all parts of the *Catalog* should henceforward be sent directly to the *Register of Copy-*

rights, *Library of Congress, Washington 25, D. C.* Orders may be placed as follows: (1) as subscriptions to continue until further notice, or (2) as orders for individual issues. All orders should state clearly the title and inclusive dates of the issues wanted. For the convenience of subscribers, payment may be made either in advance (accompanying the order) or upon receipt of an invoice from the Copyright Office. *Checks or money orders should be made payable to the Register of Copyrights.*

The price of each individual number of the *Catalog*

is given in the Table of Organization. The annual subscription rate for each part is twice the price of a single number, since all parts are issued semiannually. The complete *Catalog of Copyright Entries* for one year may be secured on a subscription basis for \$20.

Inquiries.—The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Please address communications of this nature to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

ABBREVIATIONS

The following list includes abbreviations used in this catalog with specific copyright or bibliographic meanings. Definitions are not given for abbreviations in common use.

COPYRIGHT REGISTRATIONS FOR MAPS

July–December 1949

Class F—Maps published in the United States	749
Maps published outside the United States	7
Total	756

The above figures show the registrations for maps for July–December 1949, but do not necessarily represent the exact number of entries in this issue of the *Catalog*.

MAPS

An alphabetical list of all maps registered during the period covered by this catalog. Each map is entered under authority (i. e., the name of the person, firm or other agency primarily responsible for the content of the map). Included in the list are cross references from the geographical areas represented by the maps and from copyright claimants, authors, compilers, etc. Under each main heading full information relating to the map is given.
